

DRESSING ROOM TRY-ON BEST PRACTICES

Wear full coverage undergarments or body shapers to ensure the most hygienic try-on. When trying on swimsuits, full coverage panties and a bra **MUST** be worn.

Cover small nicks and cuts with a bandage before try-ons

to reduce the risk of bacteria from fabric entering the wound.

Clean hands before and after trying on clothing and touching areas like door knobs, and clothing racks to maintain the highest hygiene possible.

An anti-bacterial sanitizer is good. Best practice, as recommended, is washing with soap and water for 20 seconds.

If possible, use protective cover ups such as makeup face covers, socks or knee-highs

when trying on clothing and shoes to keep infectious particles that may be left from previous customers from transferring to your skin.
